

SEATRANSPORT

Sea Transport Solutions Pty Ltd (STS) offers specialist marine design and consulting services and has extensive experience working with commercial, and military vessels.

Sea transport Logistics Pty Ltd (STL) focuses on the consultancy and design of bulk handling solutions.

MV 'Deepwater'

'Aburri'

STS and STL are part of the Sea Transport Corporation group of companies which own, operate and construct commercial vessels. We pride ourselves as designers with 'real experience', with our staff having a diverse range of skills and a unique understanding of technical, commercial and operational aspects of ship design, construction and operation.

'Wunma'

FHT Fwd

Sea Transport offer bankable feasibility studies providing in depth review of proposed shipping operations, including assessment of capital and operating expenditure, route optimisation, optimum vessel type / size / speed, crewing requirements and shore infrastructure requirements.

We provide design services from concept design, hull optimisation and tank testing through to advanced structural design, Class approval and production (CNC) detail.

Sea Transport also offers supply of pre-cut 'kit' vessels allowing builders to begin construction immediately and to reduce overall construction time. During construction our project managers provide supervision services to ensure overall quality of construction and compliance with owner requirements.

FHT Containers

Operating since 1976, Sea Transport has a proven record of successful, innovative designs currently operating in 45 countries worldwide.
